UltraWiz® 1012-M

SPECIALTY BLADE

UltraWiz® Offset Clearance Blade 1012-M

Use to avoid paint damage on the tops of fenders when cutting down the "A" Pillar

UltraWiz® Original Blades The 1000 Series

The 1000 Series was introduced in 1986 as the Windshield Wizard Blade. In 1993 the name was changed to the familiar trademark UltraWiz®. Known for being reliable, sharp and tough, UltraWiz® became the most popular cold knife blade for the auto glass replacement industry.

UltraWiz® Original Blades, "the blades that permanently changed the industry", are manufactured by A.N. Designs Inc., one of the first companies to use compound angles in their blade design. The purpose of this design is to give the blade sharper angles, making it easier for technicians to find "the sweet spot" during cutting. Made from high-quality steel, the blades are put through a special coining process that compresses the metal and are then heat-treated to meet the UltraWiz® high standards. The engineers at UltraWiz® continually improve the processes to maintain blade thickness, strength and durability our customers have come to rely on.

Selected by the majority of technicians in the industry today.
