Interior Precut Blade 5500-M

UltraWiz® Interior Precut Blade 5500-M

1/2" Cut Length
Use as a starter blade to ease cutting
Designed to be used for the removal of Dodge
Truck Sliders and others

UltraWiz® Interior Blades 5500-M and 5501-M

Based on the UltraThin 5000 Series Blades, the UltraWiz® Interior Blades are designed to reach and cut the urethane adhesive of all Dodge Truck Sliders, from the inside, without removing most interior panels or headliners. The proper cutting length and angle makes this blade ideal for getting under the encapsulation from the interior of the cab. The unique design has a positive depth stop manufactured right into the blade. With this feature, you always know how deep you're cutting, without the worry of pinchweld contact. The shank of the blade is angled back to allow the UltraWiz® Lever Knives access in tight places, such as above headliners or behind quarter trim panels. Technicians have commented that the blade works exceptionally well with the UltraWiz® UltraThin Lever Knife (3008-K). The blade is also being used for interior removals on many other quarter window, and windshield applications.
